SUMMARY

I specialize in creating dynamic and responsive web applications as a MERN developer. My skills include MongoDB, Express.js, React.js, and Node.js. I am dedicated to writing clean and efficient code, focusing on a user-friendly design. I'm well-versed in modern design principles and often use libraries like Tailwind CSS to improve the visual appeal of my projects. The utility-first approach of Tailwind CSS helps me streamline styling, leading to quicker development and a consistent design.
